

Exazor™ is an new generation Web vulnerabilities scanner for application security. Exazor™ is one of the leading web vulnerabilities scanner in the world and it is compatible to all kinds of complicated applications (such as WEB, ERP, SSL).

Supports over 95% of main stream databases in the market

Security All in One

Created and developed by experienced security experts

Exazor™ was first launched in the "Black Hat 2006 & "Def-con" which inspired worldwide attention very soon. It was entitled as "the best Web security appraisal assessment tool" by Pete Finnigan (top security expert of Oracle Corporation) and "The best blue teaming and red teaming tools" by Oracle's CIO. Years later, Exazor™ upgraded become a more powerful and perform better than even among worldwide application security tools.

Powerful functions for protecting your web application and services

Exazor™ helps to protect your application system from the attack of critical and high-risk security vulnerabilities (Cross Site Scripting, Information Leakage, SQL Injection and Predictable Resource Location) by its powerful functions:

- Deep-scanning on Web application
- Auditing database configuration
- High-efficient and reliable penetration testing
- Thorough security Logical analysis
- Recommendations and solutions

KEY FEATURES AND BENEFITS

Accuracy

- Attempts to carry out data-acquisition according to the fingerprint characteristics of different databases and confirms the flaw.
- The scanning result is absolutely accurate with low false-drop rate and undetected error rate with very low false-alarm rate

Efficiency

- Running by a proprietary high speed scanning engine
- Proven that the scanning speed of Exazor™ is 2 to 8 times faster than other leading application system scanners in the worldwide

Flexibility

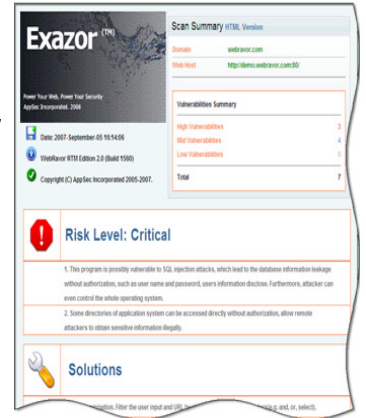

- Programming language independent: It performs customized penetration test with a "black box" like application system
- Exazor™ is applicable adapt for two scanning modes : initiative and automatic scan or passive scan with users' interference

Automation

- Support a batch like scanning mode
- Flexible scheduler for time controlled scanning services
- System management security is insured by different admin and user right control levels

Powerful

- Support variety of complicated application system, including Oracle / DB2 Microsoft SQL server /Access / MySQL / PostgreSQL / INFORMIX / Sybase/ Interbase and FireBird. According to the fingerprint of different databases, it can make a vulnerability analysis with pertinence
- Providing different powerful and high efficient penetration test models by a convenient click-to-go process
- Fully apply to all SSL, Exazor™ can automatically gather acquire all the necessary elements and analyze the transferred information based on SSL and make security appraisal assessment for Web applications which bases on HTTPS protocol, such as e-network banking
- Vulnerabilities will be shown by visualized evidences and report

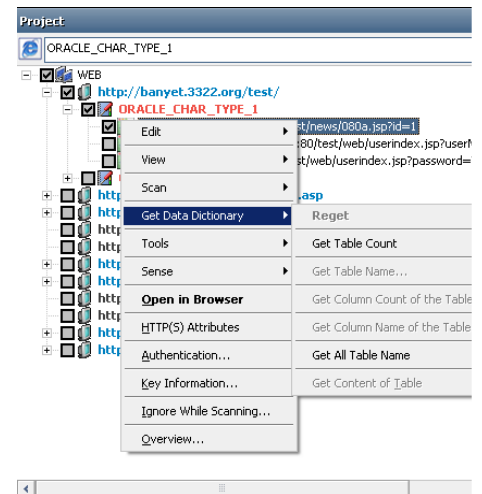

Intelligence

- Speed up scanning process by automatically filtering out any repeated web pages
- Intelligent calculation and analysis structures of application systems

User Friendly

- Simple setting and operation interfaces
- Multi-tasking: Flexible for starting a new task during the scanning process
- Simple and convenience platform, user can pick up easily
- Provide simple and flexible report template, content and format of report can be tailor-made to fulfill different users
- Provide Chinese and English interface

Complete solution tools

Exazor™ offers different editions for providing a complete solution to different users.

- Standard Edition : basic function for all Web application system
- Professional Edition : suitable for moderate application scale
- Ultra Edition : suitable for research and audit groups
- VLK Edition : suitable for large enterprises and IT security consultancy service providers
- Enterprise Edition : suitable for very large enterprises

Technical specifications

- Window 2000 , 2003, XP and Window Vista
- Microsoft Internet Explorer 5.0 or higher
- 1 GB of RAM
- 1 GB of free disk space
